The purple area is more correct from the records that we have and what we were told. When we put in our sewer system in, the grant from the USDA said that the boundary in purple was what we had to go by.

Subject: Oxford Boundary

I work for the state agency who maintains a statewide map of cities—we also report those boundaries to the US Census Bureau. When doing a comparison between what we have for Oxford and what census has, I notice an area of disagreement. Can you please review the map below and let me know your thoughts? If census is more correct, we may need to look into getting the state map corrected because several state programs, such as DFA sales and use tax lookup, use our boundary data. I look forward to hearing back from you.

Blue line is census and purple color is state. Which is more correct, census or state?
